Qw. Destiny of the nation is shaped in the classroom.

“children are like buds in a garden and should be carefully and lovingly nurtured, as they are the citizens of tomorrow” — Pt. Jawaharlal Nehru

This quote reflects the future which lies in the youth. Classrooms are the temples of learning, helps to shape individual. The classroom is the window to success and key which can unlock the child's potential which is hidden inside.

Classrooms are like a thread which connects present to the future. A very beautiful Chinese proverb states that “If you are thinking a year ahead, plant a seed. If you are thinking a decade ahead, plant a tree. If you are thinking a century ahead then educate the people.” This means that education can play a significant role in deciding the destiny of Nation!

From the time of Rigveda, our ancient education system focused on the holistic development of the individual by taking care of inner and outer self. It encompasses on the values like humanity, self-reliance, discipline etc. Education was imparted at home, temples and gurukuls where the young children resided in ashrams and learned about history, art, literature, Shastra, upnishads, medicines. Charak Samhita was one of the important example which highlights the significance at that age.

Even in Medieval era, the <sup>learnings</sup> teachings of Chandra gupta by Chanakya leads to one of the best administration. The Guerrilla training of great Chattrapatti Shivaji had a great significance in the war with Mughals. These teachings are still part of culture and practised by us in various fields like medicine, defence, law and order.

India's Our Freedom Struggle which decided the destiny our Nation was a result of liberation among people. Our freedom fighters fought to liberate the motherland from the shackles of British govt. The classrooms of colonial times are also played a role in the propagation of Nationalism by debate, discussion of Swaraj movements.

In 1947, India and Pakistan both got independence at same time. Yet they shares different orbit in terms of economy, political stability. one Nation worked on building its human capital which eventually played an important role in shaping destiny of Nation. India witnessed Missile man - Dr A.P.J. Abdul Kalam, because of the power of classroom. Recently India's Chandrayaan Mission setting an example in front of the world that if there is a will there is a way. Even in such a small amount of budget we developed our indigenous craft & become the 4th country to go to Moon and land successfully.

The investment which Japan made on the education, institutes, infrastructure, employment led to rise the country as one of the leading economic country.

"One book, one Pen, one child and one educator, ~~it~~ may change the world". Greta Thunberg, at the age of 11 year, she commendably did an excellent work to prevent environment and take necessary actions only because of his knowledge.

International

Due to widely accepted education model of Finland, Finland achieved a place in 4th largest Economy of Europe. The Educational model, which is friendly, informative and technologically advanced classrooms directly aided to the Country's GDP and Economic growth.

Even if we look at our Country's graph of past few decades we also had performed commendable. In almost every field. The classrooms leads to enlighten students, aware of their surroundings, improved health ultimately results in more healthy active working population and decreasing demographic dividend. This overall results in economy. India worked on its Health and education in past years very well as per the data of Niti Aayog ~~MPI~~ multi Dimensional Poverty Index (MPI) reduced to 14.96%.

Economic and social

Currently India is witnessing the highest demographic dividend according to Economic survey which means our Country has the potential for the tremendous economic growth if utilised properly. The efficient education, training, upskilling can leads to the doors of economic prosperity. It will help us to achieve the target to reach in top-3 countries in terms of Economy in the world.

In today's world we should focus more on PSU's and MNC's (multinational corporations). one of the major key factor towards the growth of MNC's is the multicultural multinational culture that allows them to employ best minds from different geographical areas. They collect the brightest minds from varied educational system, ideas, innovations and perspectives which is the secret of their growth.

Classrooms are the temples of learning. Classrooms help to shape the individual personality and the behaviour of the individuals. As we say in Ancient times also the character of an individual was influenced by the teachings of Guru/Acharyas. Likewise, even in today's era the values like honesty, integrity, tolerance towards others, Respect, kindness, compassion etc are inculcated by the moral and ethical teachings in the classroom.

Limitations  
Classrooms

But the classrooms are not efficient, well structured now-a-days. The more focus is on grasping the things rather than to imply practically in the different aspects of life which makes the learning boring. It also restricts the cognitive development of the children, a huge divide among skilled and unskilled population increased which is liability for the country. For this the government has come from time to time with the various programs, schemes to fill this wide gap. Schemes like Atal laboratories, ITI's, Science, Technology,

Engineering and mathematics] STEM, Pradhan Mantri Kaulhal Vikas Yojna, New Education Policy 2020 which includes coding from class 6<sup>th</sup> itself are some initiatives which can lead us towards a better future.

Apart from this the Govt. should work on the proper implementation of all programs to get full results. There should be an efficient audit - mechanism which can regulate the working in righteous manner to ensure the inclusivity to the marginalise & vulnerable section also. Art and culture can also play an imp. role to assist the students in developing the soft skills. It will promote the skills like Cooperation, teamwork, more prepare to handle tasks in a defined manner and time apart from academics.

India should work to improve the infrastructure of schools by installing digital boards, advanced laboratories to promote digital learning. It will help to visualise the concepts to students. Personality development programs should be promoted to improve the overall personality, confident and it <sup>can</sup> also proved beneficial in self-discovery or self introspection. Career counselling along with the knowledge can aid the students to have clarity in their mind about the path of future. Society will depend on the youth and youth's ideology is broadly on the family, surrounds and most importantly on the classrooms so it is golden opportunity to us to boost our prosperity and becoming a just society.

# PARAMETERS

	REMARKS
1. Relevance to the main argument	Yes - relevant
2. Completeness / Multi dimension	Covered - almost all important ones
3. Organization and planning	Good
4. Intro	
a. Relevance	Yes
b. Interesting/Captivating	Interesting
c. Encapsulating (all ideas of entire essay)	Yes.
5. Body	
a. Cohesiveness/idea arrangement	Good
b. Flow of ideas	Good
c. Concise	Yes
d. Any vagueness/ ambiguity	Not much
e. Presentation	Good
f. Selection of examples	relevant
g. Proportion of each theme	Balanced
h. Persuasiveness	Quite
6. Conclusion	
a. Did it answer the main theme?	No
b. Was it a repetition of intro?	No
c. Did it introduce a new concept (it should not)	No
d. Creativity	Need more depth

60  
125

Introduction - Good and relevant

Body -

- Good flow of ideas
- logical arrangement of each theme
- presented passionately
- in depth and insightful

Conclusion - needs improvement - should have more depth and content
